Career Objective

I am a creative and passionate individual with a background in operations management and a growing interest in technology. I enjoy coming up with creative solutions and pushing forward with new ideas.

Educational Summary

- Develop enough skills to face the challenges of contemporary industries and markets. Capable of dealing with routine tasks at production/ operations department.
- Enough understanding of how to formulate and implement operational management strategies
- Currently Enrolled in Generative AI Program to explore and implement latest technology.

Experience

INSTRUCTOR | GOVERNOR SINDH INITIATIVE FOR CLOUD APPLIED GENERATIVE AI | FEBURARY 2024 - PRESENT

- As an instructor of typescript I empower students to leverage Typescript effectively in their pursuit of Cloud Applied Generative AI. My dedication to excellence and passion for sharing knowledge contribute to the success and growth of the initiative, as I continue to inspire and mentor aspiring developers on their journey to mastery.

FREELANCE |FIVERR | 2023 – PRESENT

- Utilized industry standards: Employed best practices and industry standards in website schema design, ensuring compatibility with various devices and browsers.

COSTUMER SUPPORT REPRESENTATIVE| JOHAR SOFTWARE HOUSE | 2022 – (5-MONTHS)

- Collaborated with team members to ensure a high standard of customer service.
- Managed and adhered to Service Level Agreements (SLAs) to ensure timely response and resolution of customer issues.

Projects

Management Project:

My research project, "**Impact of Organizational Culture on Employees Performance**," utilized quantitative methods to examine the relationship between organizational culture and employee performance. Through data collection and analysis, I uncovered significant insights into how organizational culture influences key performance metrics.

IT Projects:

- The Ecommerce UI Project showcased my adeptness in designing intuitive user interfaces tailored for online retail environments.
- Crafting a Chabot via Streamlit highlighted my capacity to develop interactive and user-friendly conversational interfaces for streamlined communication.
- Creating a To-do API using SQLAlchemy and FastAPI underscored my capability in implementing efficient data management solutions with robust backend frameworks.

Academic Qualification
